The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

---

Contents continued from outside back cover

**Methylation of IGF2 regulatory regions to diagnose adrenocortical carcinomas**

727–737

**Growth hormone and risk for cardiac tumors in Carney complex**

W Patricia Bandettini, Alexander S Karageorgiadis, Ninet Sinaii, Douglas R Rosing, Vandana Sachdev, Marie Helene Schernthaner-Reiter, Evgenia Gourgari, Georgios Z Papadakis, Meg F Keil, Charalampos Lyssikatos, J Aidan Carney, Andrew E Arai, Maya Lodish & Constantine A Stratakis

739–746

**EMT reversal in human cancer cells after IR knockdown in hyperinsulinemic mice**

Zara Zelenko, Emily J Galagher, Inni Markella Antoniou, Dwayne Jachimowicz, Anupama Naja, Douglas Vee & Derek LeRoith

747–758

**Analysis of potential response predictors to capcitabine/tomuzolomide in metastatic pancreatic neuroendocrine tumors**

M Cives, M Ghayour, B Moras, H Brooks, M Black, A Rizzo, A Meeker & J Jhsberg

759–767

**PVALB diminishes [Ca^{2+}] and alters mitochondrial features in follicular thyroid carcinoma cells through AKT/GSK3α pathway**

Thais Biude Mendes, Bruno Heidi Nozima, Alexandre Budu, Rodrigo Barbosa de Souza, Maria Helena Braga Cabras, Rossana Delcato, Marcos Leoni Gazavin & Janete Maria Cerutti

769–782

---

Readers are invited to submit their endocrinology images for entry into the Endocrine-Related Cancer cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Endocrine-Related Cancer, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to erc@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

**COVER ART COMPETITION**

The image depicts a schematic representation of human PDE4A4 and rat PDE4A5, with AIP interaction sites. Human PDE4A4 and rat PDE4A5 consist of a unique amino-terminal region, upstream conserved regions 1 and 2 (UCR1 and UCR2) separated by linker regions 1 and 2 (LR1 and LR2), a catalytic domain, and the unique carboxyl-terminal region. From Bolger et al, 23 419–431.

Credit: G B Bolger, L Smoot, M-A Accavitti (University of Alabama at Birmingham, AL, USA), M F Bizzi, S V Pinheiro, A Ribeiro-Oliveira Jr (Federal University of Minas Gerais, Belo Horizonte, Brazil), and G Trivellin, M Korbonits (Queen Mary University of London, UK)
