The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

For more information visit www.endocrinology.org

Readers are invited to submit their endocrinology images for entry into the Endocrine-Related Cancer cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Endocrine-Related Cancer, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to erc@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

The image depicts (left) Paul Wermer, who in 1954 was the first to suggest that what became the MEN1 phenotype was a genetic disorder; and (right) a hyperplastic pancreatic islet of a MENX mutant (p27 deficient) rat: α-insulin (red), α-glucagon (green).

Contents continued from outside back cover

- OP449 inhibits breast cancer growth without adverse metabolic effects
  Gadi Shlomai, Zara Zelenko, Irini Markella Antoniou, Marilyn Stasinopoulou, Aviva Tobin-Hess, Michael P Vitek, Derek LeRoith & Emily Jane Gallagher
  S19–S29

- Molecular characteristics of the KCNJ5 mutated aldosterone-producing adenomas
  Masanori Murakami, Takanobu Yoshimoto, Kazuhiko Nakabaiishi, Yufu Nakanoto, Takahiro Fukushii, Kyoshiro Tsuchiya, Naomu Nishii, Ryotaro Bouchi, Kohji Okamura, Yoshiika Fujii, Koshi Hashimoto, Ken-ichiro Hata, Kazunori Khara & Yoshhiro Ogawa
  S31–S41

- Differences in miRNA expression profiles between wild-type and mutated NIFTPs
  Gadi Shlomai, Zara Zelenko, Irini Markella Antoniou, Marilyn Stasinopoulou, Aviva Tobin-Hess, Michael P Vitek, Derek LeRoith & Emily Jane Gallagher
  S43–S53

- The microenvironment induces collective migration in ZD7453-silenced mouse pheochromocytoma spheroids
  Vanessa D’Antongiovanni, Serina Martinei, Susan Richter, Leltia Canu, Daniele Guasti, Tommaso Melo, Paolo Romagnoli, Karel Pacak, Graeme Eisenhofer, Massima Mannelli & Elena Rapizzi
  S55–S64
