Call for Chief Editor of the European Journal of Endocrinology

The Society of the European Journal of Endocrinology is seeking a successor to the present Chief Editor who will be retiring from the post in 1998.

Suggestions should be sent before 1 September 1997 to the Chairman of the Search Committee:

Professor Wilmar Wiersinga,
Academic Medical Center F5-171,
Meibergdreef 9, NL-1105 AZ Amsterdam,
The Netherlands (Tel: +31-20-566 6071; Fax: +31-20-691 7682;
E-mail: w.m.wiersinga@amc.uva.nl).
Journal of Endocrinology

- Fully international content
- All papers rigorously peer-reviewed
- Worldwide readership
- No page or reviewing charges
- Contains commentaries and reviews of topics of current interest
- Offers rapid publication

A major international journal covering all aspects of the nature and functions of the endocrine system

Subscription and submission details, as well as sample copies, are available from:

Journal of Endocrinology Ltd,
17/18 The Courtyard, Woodlands,
Bradley Stoke, Bristol BS12 4NQ, UK.
Tel: +44-1454-616046;
Fax: +44-1454-616071;
E-mail: info@endocrinology.org.

ISSN 0022-0795 Monthly plus supplements 1997 Volumes 152-155

A Society for Endocrinology publication
Journal of Molecular Endocrinology

- All papers rigorously peer-reviewed
- International coverage and editorial board
- Contains commentaries, reviews, original research papers and rapid communications
- **No page or reviewing charges**
- Rapid publication
- Wide international circulation

An international journal at the forefront of endocrinology, reporting cutting-edge research into molecular and cellular aspects of the subject

Subscription and submission details, as well as sample copies, are available from:

Journal of Endocrinology Ltd, 17/18 The Courtyard, Woodlands, Bradley Stoke, Bristol BS12 4NQ, UK.
Tel: +44-1454-616046; Fax: +44-1454-616071;
E-mail: info@endocrinology.org.

ISSN 0952-5041 Bi-monthly 1997 Volumes 18 and 19

DHEA and Sex Steroids: Intracrinology in Target Tissues

Edited by F Labrie, A Bélanger, J Simard & V Luu-The

£30.00/$69.95, 265 pages, paperback, ISBN 1 898099 10 3

Dehydroepiandrosterone (DHEA) and its sulfate are the major steroids produced by the adrenal glands. Although found in high concentrations in the blood, until recently they were not generally considered to have significant physiological or pathological roles. However, recent evidence indicates that they may have significant involvement in both health and disease. This book provides a comprehensive overview of state-of-the-art research into these intriguing steroids.

Based on the proceedings of the International Symposium on DHEA Transformation into Androgens and Estrogens in Target Tissues: Intracrinology, held in Quebec in late 1995.
